

Crie um banco de dados:

Faça login no <https://www.mongodb.com/>

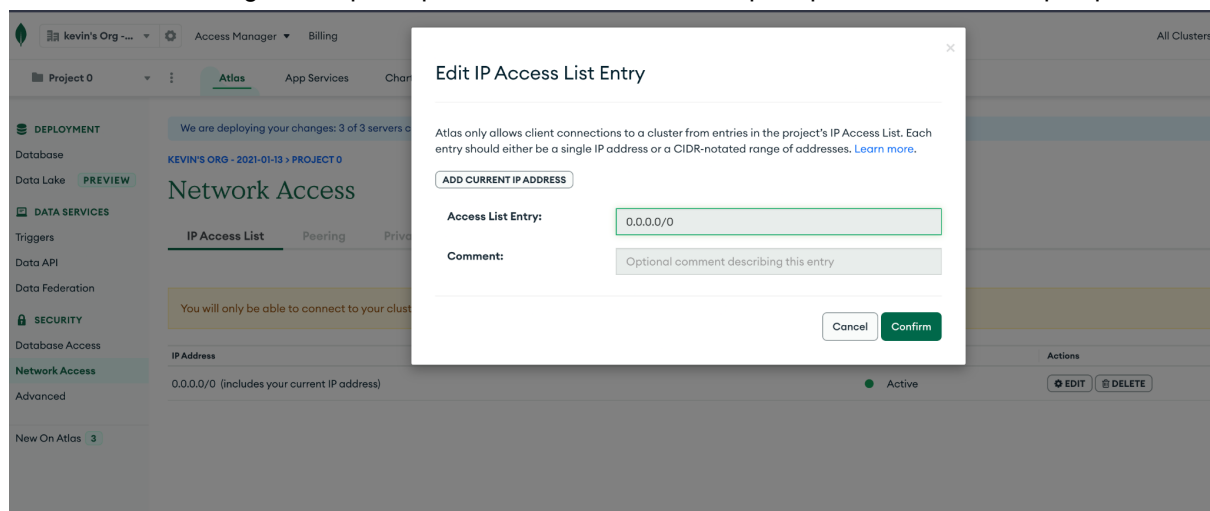

Crie um cluster (free tier)

Em database access, clique em Edit

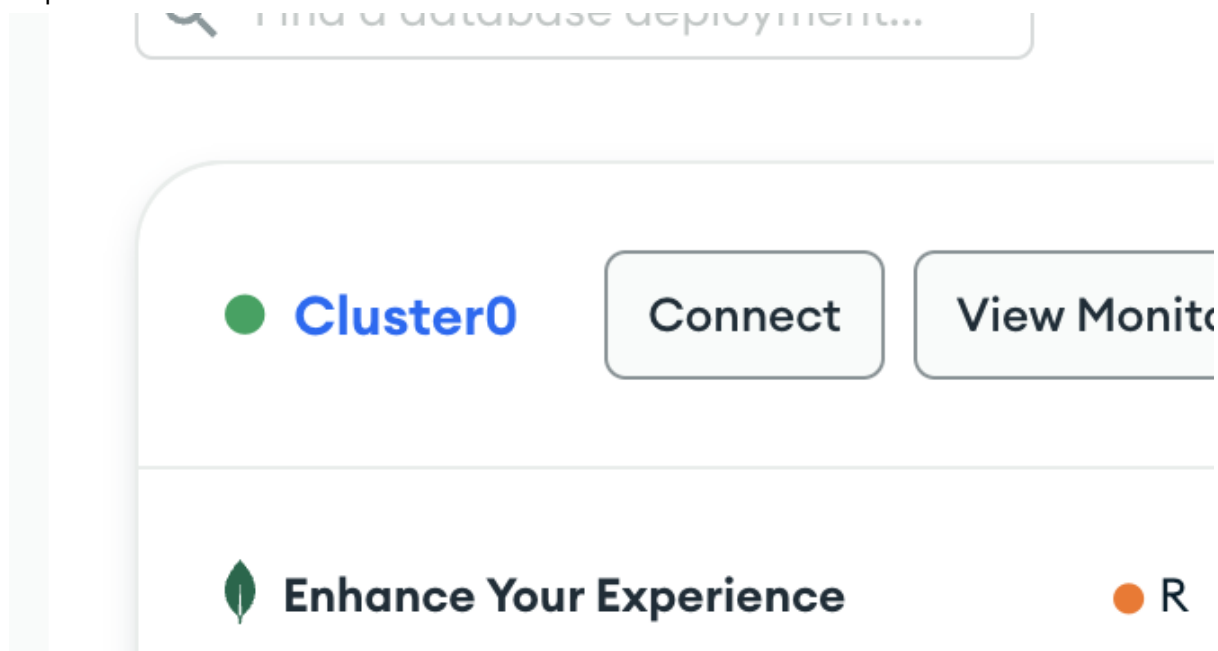

Gere uma senha e guarde ela

Em network access garanta que o ip 0.0.0.0/0 está adicionado para permitir acesso de qualquer um

Clique em Connect no seu cluster

## Connect your application

### Connect your application

Connect your application to your cluster using MongoDB's native drivers

Salve a URI gerada e substitua <password> pela senha que você gerou

## Connect to Cluster0

✓ Setup connection security

✓ Choose a connection method

Connect

### 1 Select your driver and version

DRIVER

Node.js

VERSION

4.1 or later

### 2 Add your connection string into your application code

☐ Include full driver code example

```
mongodb+srv://admin:<password>@cluster0.r5wny.mongodb.net/?
retryWrites=true&w=majority
```

Replace **<password>** with the password for the **admin** user. Ensure any option params are [URL encoded](#).
